PROFESSIONAL SUMMARY

Former Business Application Consultant turned QA professional with a strong HRIS background. Completed a QA bootcamp focused on manual and automation testing, defect tracking, and test scenario creation. Experienced in functional validation, data migration, user training, and end-to-end QA workflows. Detail-oriented, adaptable, and committed to delivering high-quality products through testing and clear documentation.

WORK EXPERIENCE

PT. INTIKOM BERLIAN MUSTIKA (SALIM GROUP)

Jakarta, ID

Business Application Consultant (HRIS) – Support Division

Jul 2022 – Apr 2024

- Consulted with clients on data conversion and training needs, ensuring smooth implementation and strong user engagement.
- Handled existing client issues by creating test scenarios in Excel and using SQL Management Studio to quickly fix problems, improving system reliability and user-satisfaction.
- Coordinated weekly feedback sessions with developers via Google Sheets to improve product functionality.
- Led personalized and group training sessions, increasing client efficiency with new systems.
- Performed manual testing on the system, analyzed results, recorded findings in test logs, and helped identify issues, successfully reducing ongoing bugs by 40% to improve overall quality.
- Performed end-to-end product implementations, including Alpha and Beta testing, ensuring early issue detection and client-ready deployment.

PT. GRAHA TECHNOSOFT INFORMATIKA

Jakarta, ID

Data Migration Consultant - Internship

Feb 2020 - Feb 2021

- Managed data migration from legacy system user to Dealer Management System (DMS) that has been developed.
- Advised on data documentation and performed client data testing to improve accuracy.
- Collaborated with clients and management to gather and clarify data migration requirements, ensuring alignment with project goals and reducing errors.
- Executed data transfer and edited data content as directed by Project Leader, maintaining data integrity and supporting successful project delivery.

PROJECT

E-Commerce App QA - Tokopedia.com - Apr 2025

[Link Project](#)

Created and maintained automated test scripts using **Katalon Studio**, focusing on critical e-commerce flows including login, registration, item search, and the checkout process. Ensured consistent functionality across releases by improving test reliability and coverage.

Booking Movie Ticket QA - TIX ID - Apr 2025

[Link Project](#)

Developed and executed automated test cases in **Katalon Studio** to ensure the reliability of core features in the TixID app. Validated key user flows including login, registration, ticket selection, seat reservation, and payment processing.

E-Commerce Web QA - Soaplesure - Apr 2025

[Link Project](#)

Designed and conducted end-to-end test automation using **Cypress**, covering key user flows such as login, registration, item filtering, and payment validation. Enhanced test reliability and contributed to faster, more stable release cycles.

Performance & Load Testing API - Zalora - Apr 2025

[Link Project](#)

Conducted API load testing using **Apache JMeter** to evaluate response time, throughput, and server stability under high-concurrency conditions.

EDUCATION

Universitas Bina Nusantara

Jakarta, ID

Bachelor Degree / SI

September 2021

- GPA 3.14

CERTIFICATIONS & ACHIEVEMENT

[Course Certificate](#) | Private Class : QA Effective Testing Strategies | Eduwork | 2025

[Award of The Best Client Handling and Support](#) | PT. INTIKOM BERLIAN MUSTIKA | 2023
